North Harrison Medical Clinic

Harrison County Community Hospital District d.b.a. HCCH Medical Group is developing plans to construct a two provider Rural Health Clinic, on property purchased by the hospital in Eagleville, Missouri.

The hospital has negotiated to purchase approximately 2.5 acres of vacant property from Rob Hutton on the north side of HWY "N". (Please see map on next page.)

The hospital is currently soliciting bids to construct a Modular Medical Clinic (approximately 2,500 – 3,200 sq. ft.). The clinic will be constructed in a factory, in modular sections and transported to the site for erection on a foundation.

The proposed rural health clinic will be open Monday thru Friday; and will be initially staffed with a Family Nurse Practitioner, a Licensed Practical Nurse and a Receptionist. The clinic is being designed to accommodate a second primary care provider at some future date. The clinic will be under the supervision of Dr. Chad Lambert DO. We are currently recruiting for these positions. We anticipate the medial clinic will provide approximately 15 – 25 primary care patient encounters per day. The clinic will be a provider for the **CDC Vaccines for Children program** and also offer flu shots and other immunizations to the general public.
